Mount Pleasant, SC - Doctors Eric Brittain and Tim Osbon announce the opening of Oasis Hyperbarics at 1156 Bowman Road, Suite 103, in Mt. Pleasant—a new medical treatment clinic specializing in Hyperbaric Oxygen Therapy. Used worldwide for many years and commonly called HBOT, this method of medical treatment delivers 100% oxygen to a patient within a pressurized chamber. During a HBOT treatment session, pressurized oxygen fills the hyperbaric chamber, increasing the oxygen concentration within a patient’s body to 15-20 times greater than normal atmospheric pressure. Increased oxygen tension accelerates healing processes and aids in recovery from a wide variety of medical conditions and illnesses, including: autism, brain injuries, chronic pain syndromes, Crohn’s disease, interstitial cystitis, Lyme disease, non-healing and post surgical wounds, rheumatoid arthritis, scleroderma, sports injuries and ulcerative colitis.

Please call us at 843-654-7337 to schedule your free physician consultation. You are also encouraged to contact John Bohr, Clinical Director, for more information about Hyperbaric Oxygen Therapy and the Oasis Hyperbarics clinic.

Also, please visit www.oasishyperbarics.com for a complete list of treatable conditions, a description of what patients can expect during the course of treatment, and testimonials from patients who have benefited from hyperbaric oxygen therapy.
